CaPSURE™ Turns Fifteen

Entering a New Year and a new decade causes us to pause and reflect on our past accomplishments and future goals. On May 10th of 2010 CaPSURE™ will mark a major milestone, its 15th anniversary.

Most importantly, we are forever grateful for the enduring support and contributions of you, the patient-participants, who have given your time to complete our health surveys over the past 15-years.

Since 1995 some of our accomplishments are:

- 13,800 men and 40 urology practices have participated in CaPSURE™.
- 131 published research papers in professional journals (see www.urology.ucsf.edu/capsure and mouse to the publications link).
- Since 1999, the CaPSURE™ study has supported the UCSF-CaPSURE™ Scholars Program in Prostate Cancer Outcomes Research. The goals of the scholarship are to advance prostate cancer research and to support the career development of young investigators. Scholarships have been offered to qualified residents and fellows at accredited US training institutions. Scholars, working from their home institutions, formulate research plans under the mentorship of senior CaPSURE™ investigators. To date over 42 scholars have published research papers in professional journals.
- International collaborations:
  - The Japanese Urological Association: In January of 2009, Drs. Peter R. Carroll, Matthew R. Cooperberg, and Kirsten Greene along with Jeannette M. Broering, RN, MS, MPH presented at the 3rd annual CaPSURE™ – J-CaP meeting in Kyoto, Japan. This international collaboration has resulted in a recent publication in the Journal of Clinical Oncology (see publication # 11 in the publication section of this newsletter). In December of 2009, Dr. Cooperberg was a guest speaker on behalf of CaPSURE™ at a later J-CaP meeting in Tokyo, Japan.
  - In October of 2009, Dr. Lonneke van de Poll-Franse’s paper on “Severity of cardiovascular disease and health-related quality of life in men with prostate cancer: A longitudinal analysis from CaPSURE” was nominated for the International Society for Quality of Life Research Outstanding Article of the Year Award. Dr. van de Poll-Franse is from the Comprehensive Cancer Centre South in Eindhoven, the Netherlands. She was a fellow with Mark S. Litwin, MD, MPH at the University of California Los Angeles when she conducted this analysis.

Looking to the future we continue to work diligently at maintaining a base of funding to support the ongoing activities of CaPSURE™:

- The UCSF-CaPSURE Scholars™ program has just accepted 5 new scholars out of 26 applicants. Support for this is being provided by an unrestricted educational grant from Abbott, an industry partner (see http://www.abbott.com/ ). Abbott has also contributed funds to support some of the data operations expenses for 2009-10.
- Leslie Wilson, PhD, from the UCSF School of Pharmacy, and Martin Sanda, MD, at Harvard University, has been funded to work with CaPSURE™ on two comparative effectiveness analyses of robotic prostatectomy. Funding for these projects is being supported by federal stimulus package competitive grants awarded by the American Reinvestment and Recovery Act (ARRA) of 2009.
Listed below are the CaPSURE™-related articles that have been published since our last issue.

To order the titles you are interested in, please fill in the blanks, mark the check boxes and return this form with your questionnaire in the enclosed envelope. Articles are FREE to all CaPSURE™ study participants.

Please allow 8 to 10 weeks to receive your ordered articles.

**Publications:** There were 16 new CaPSURE™ publications released by December 2009.

- What percentage of patients with newly diagnosed carcinoma of the prostate are candidates for surveillance? An analysis of the CaPSURE database.
  - J Urol. 2008 Oct;180(4):1330-4; discussion 1334-5. PMID: 18707731
  - Barocas DA, Cowan JE, Smith JA Jr, Carroll PR; CaPSURE Investigators.

- Impact of radical prostatectomy positive margins on fear of cancer recurrence: Results from CaPSURE.
  - Hong YM, Hu JC, Paciorek AT, Knight SJ, Carroll PR.

- Pre-treatment Predictors of Death From Other Causes in Men With Prostate Cancer.
  - J Urol. 2008 Dec;180(6):2447-51; discussion 2451-2. PMID: 18930498
  - Simone NL, Singh AK, Cowan JE, Soule BP, Carroll PR, Litwin MS.

- Quality of Life Among Men with Locally Advanced Adenocarcinoma of the Prostate: An Exploratory Analysis Using Data From the CaPSURE Database.
  - J Urol. 2008 Dec;180(6):2409-13; discussion 2414. PMID: 18930270
  - White WM, Sadetsky N, Waters WB, Carroll PR, Litwin MS.

- Quality of life in young men after radical prostatectomy.
  - Prostate Cancer Prostatic Dis. 2008;11(1):67-73. PMID: 17519925
  - Wright JL, Lin DW, Cowan JE, Carroll PR, Litwin MS.

- Health Related Quality of Life in Patients Treated with Multimodal Therapy for Prostate Cancer.
  - J Urol. 2008 Dec;180(6):2415-22; discussion 2422. PMID: 18930279
  - Wu AK, Cooperberg MR, Sadetsky N, Carroll PR, Litwin MS.

- Predictors of clinical metastasis in prostate cancer patients receiving androgen deprivation therapy: results from CaPSURE.
  - Abouassaly R, Paciorek A, Ryan CJ, Carroll PR, Klein EA.

- Biochemical relapse free survival with androgen deprivation therapy is age independent: data from CaPSURE.
  - BJU Int. In press
  - Aaronson DS, Cowan JE, Carroll PR, Konety B.

- Maximum vs. mono androgen blockade and the risk of recurrence in men with localized prostate cancer undergoing brachytherapy.
  - Chen RC, Sadetsky N, Chen MH, Carroll PR, D’Amico AV.

- Risk Assessment for Prostate Cancer Metastasis and Mortality at the Time of Diagnosis.
  - Cooperberg MR, Broering JM, Carroll PR.

- Risk assessment among prostate cancer patients receiving primary androgen deprivation therapy.
  - Cooperberg MR, Hnoutsu S, Namiki M, Ito K, Broering J, Carroll PR, Akaza H.

- Sociodemographic Predictors of Prostate Cancer Risk Category at Diagnosis: Unique Patterns of Significant and Insignificant Disease.
  - J Urol. 2009 Apr;181(4):1622-7; discussion 1627. PMID: 19230923
  - Dall’Era MA, Hosang N, Konety B, Cowan, JE, Carroll PR.

- The Impact of Obesity on Overall and Cancer Specific Survival in Men With Prostate Cancer.
  - J Urol. 2009 Jul;182(1):112-7; discussion 117. PMID: 19447347
  - Davies BJ, Smaldone MC, Sadetsky N, Dall’Era M, Carroll PR.

- Predictive value of serial measurements of quality of life on all-cause mortality in prostate cancer patients: data from CaPSURE (Cancer of the Prostate Strategic Urologic Research Endeavor) database.
  - Sadetsky N, Hubbard A, Carroll PR, Saltarino W.

- Comparison of Eligibility for Active Surveillance and Pathologic Outcomes in Men Undergoing Radical Prostatectomy in a Large Community-based Cohort.
  - J Urol. In press
  - Smaldone M, Davies B, Cowan JE, Carroll PR.

- Differing perceptions of quality of life in patients with prostate cancer and their doctors.
  - Sonn GA, Sadetsky N, Presti JC, Litwin MS.
